

Bring your game indoors.

Shawgrass is excited to announce our newest product innovation - Creaturf. Creaturf is a patent pending, fully customizable indoor turf solution allowing customers to print any design onto the turf surface. Creaturf is a great solution for indoor applications, such as weight rooms, locker rooms and gym facilities, where branding is key.

Come to life in high definition.

Creaturf delivers graphics with 5x higher clarity compared to other textile color processing machines and is unlike anything else available for artificial turf. Our 76 dpi high-definition print technology ensures precise lines, photorealistic detail, vivid color and smooth gradients.
